RE: Repeal Bill 36

Dear Premier Eby,

**I/We are/am** writing to express **our/my** concern with Bill 36 which you passed and enacted without proper debate or consultation with the people of B.C. The majority of British Columbians have no idea of what Bill 36 means and what impacts it will have on the public being able to receive adequate Health Care services in this Province. Bill 36 violates all Health Professionals Freedom of Speech, Bodily Autonomy and Constitutional Rights. The Bill's provision to require all Health Providers to be force vaccinated with experimental genetic drugs that cause death and harm to maintain their license to practice is unethical and extremely wrong!

Bill 36 also allows for the seizure of their property and patients records, incarceration, forced medical competency exams (eg: Jordon Peterson) and \$200,000.00 fines for exercising their right of Free Speech! As well, anyone can make false claims against health professionals with immunity of prosecution. This is Autocracy not Democracy.

You have created a Bill without forewarning or consultation with the Public or Health Care professionals that will cause the mass exodus of Health Professionals from this Province! It will also cause the further deterioration of the Health Care system especially with hundreds of nurses fired for not complying with your forced vaccination mandates.

It is crystal clear that your intention as government is to continue to force people to take experimental drugs that cause death and harm. You refuse to hire back our hundreds of fired nurses even when you know that the science is clear that the vaccinated can contract, transmit and die from Covid. The majority of countries around the World have dropped their Covid mandates. Some have stopped the shot based on the excess death and harm to young adults and children. You were elected to serve the public, not harm them. Further degradation of our Health Care system is unacceptable.

**I /We** respectfully request that you Repeal Bill 36 immediately, hire back our Nurses and Doctors, initiate a public consultation process that will create a HealthCare system that serves British Columbians and does not continue to harm them. It is time to end your unscientific mandates, end censorship of Science, help the vaccine injured, and work for British Columbians, not special interest groups such as Big Pharma. I look forward to your response to **my/our** concerns.
